

MARKING AND PACKAGING

A unique serial number along with material is marked on each thermowell manufactured by Tempsens. This unique serial number for each thermowell ensures vendor accountability for each and every thermowell. If required Tag numbers are also marked on it. Thus, there is 100% full traceability for every thermowell manufactured in Tempsens.

Special attention is given to deliver the most fragile or the bulkiest products. Thermowells first are packed with PVC sleeves to protect it from scratching and then these are packed in cartons and finally in wooden boxes before dispatch. We ensure that Thermowells are delivered in perfect condition at the destination.
